Detailed Review Answers for Key Concepts

Physics Midterm Review Answers

Q1: What is Newton's First Law of Motion?

Answer: Newton's First Law states that an object at rest stays at rest, and an object in motion stays in motion at a constant velocity unless acted upon by an external force. This principle is also known as the law of inertia.

Q2: How is work calculated in physics?

Answer: Work is calculated using the formula:

$$W = F \times d \times \cos(\theta)$$

Where:

- W is work
- F is the force applied
- d is the distance moved by the object
- θ is the angle between force and displacement

If the force is in the same direction as displacement, then:

$$W = F \times d$$

Q3: Describe the conservation of energy.

Answer: The law of conservation of energy states that energy cannot be created or destroyed; it can only be transformed from one form to another. For example, potential energy can convert to kinetic energy during motion.

Chemistry Midterm Review Answers

Q1: What is an atom?

Answer: An atom is the smallest unit of matter that retains the properties of an element. It consists of protons, neutrons, and electrons.

Q2: How do ionic bonds form?

Answer: Ionic bonds form when electrons are transferred from one atom (typically a metal) to another (typically a non-metal), resulting in positively and negatively charged ions that attract each other.
